NICK NEWBURG
WEB DEVELOPER

Summary

Logical problem solver that adores programming rewarding creative solutions. I love competitive card/board games, fishing, hockey and anything philosophical. I have worked and volunteered for AssistList.ca for 8 months in a full product cycle environment. Using professional version control with feature branches and test environments hosted. Over a dozen features or projects launched in coordination with the design or marketing team. My experience enables me to assimilate into a development role smoothly as I have evolved my education into real world development phenomenally. A more detailed summary can be found on my website nicknewburg.ca

Employment

AssistList - Canada summer jobs   Jul. 2020 - Aug. 2020
Full Stack Web Developer

Worked with AssistList.ca in a full product cycle environment with multiple feature and test branches simultaneously deployed. Worked within a sprint cycle management structure with a designer and developer in a team to launch 5 projects under strategic timelines.

Acted as liaison between design and development team discussing time/cost benefit of features in question demonstrating innate ability to communicate between teams. HTML, CSS, JavaScript, React Redux, Ruby on Rails, Docker, Semantic UI, PostgreSQL all used with advanced components and practices invoked. Including evolving previously built features and brand new features. Provided groundwork for a Design System outside the scope of the summer jobs objective.

Sol Sunbelt Cookery   Aug. 2012 - Apr. 2013
Chef

Worked as Garde manger/dishwasher in a high end restaurant. Preparing complex and intricate cold appetizers and salads. Simultaneously prepping for the entire kitchen while maintaining the dish area. Multitasking with a heavy sense of urgency was required on even the slowest shifts. During peak times it was a hurricane of frenzied activity.

Cactus Club Cafe   Jun. 2011 - Jan. 2012
Chef

Multi tasked between the dish-pit, preparation area, and the appetizer station. There was always a task to be done and efficiency and growth was a constant every shift. Sequenced the order of jobs to maximize productivity at an ever improving rate.

Volunteering

AssistList · Development Manager   Mar. 2020 - Current

Working as a Web Developer with AssistList.ca in a React and Ruby on Rails environment hosted by AWS. Have created or modified dozens of features, both on the front end and back end. Strong Git version control experience working in a team with several developers, feature branches, and live test environments. HTML, CSS, JavaScript, React, React Redux, Ruby on Rails, Docker, Semantic UI, PostgreSQL all used with advanced components and practices involved. Continuously growing and expanding my ability to handle any challenge.

Manage orientation, recruitment, and cross team communication as development manager. Involved with other team leads to discuss procedural improvements, cross team projects like Google Analytics for marketing team or continuing development of a Design System library with the design team.

Gordon Neighbourhood House · Tax Filer   Mar. 2016 - Apr. 2016
Filed personal income taxes for the elderly and disabled using Efile. Explained and chatted with those unable to understand or file their personal income tax returns.

WEB DEVELOPER

Projects

Partners - AssistList   Aug. 2020
Single page project with advanced responsive design protocols, filtering back end data pulls, and allowing administrators to add, remove, or edit a partners name, description, or website link. Strong communication skills to collaborate with a design team over limitations of wire frames in question. HTML, CSS, JavaScript, React Redux, Ruby on Rails, Semantic UI.

Resources - AssistList   Aug. 2020
Multi page project involving a landing page, impressive responsive design, and implementing google maps. Strong end points written to pull from database and allow administrators to add, remove, or edit dynamic content without developers attention. HTML, CSS, JavaScript, React Redux, Semantic UI, and Ruby on Rails, Google Maps, Iframe, and webkit hover transformations.

About Us - AssistList   Jul. 2020
Multi page project with several strong responsive design elements at work. Numerous back end calls to present statistics and team members dynamically, allowing administrators to add, remove, or edit data without developer attention. HTML, CSS, JavaScript, React Redux, Ruby on Rails, Semantic UI, and Slick-slider.

Portfolio   Jan. 2020
A deployed website featuring a biography and live demos of projects compiled into one website. Using JS.Express, HTML, CSS, Javascript, Jquery, Node.JS, PSQL, Ajax, Bootstrap, and Knex.

PizzaShack   Sep. 2019 - Oct. 2019
PizzaShack is a full stack web application that emulates a food ordering service. Using JS.Express, HTML, CSS, Javascript, Jquery, Node.JS, PSQL, Ajax, Bootstrap, and Knex.

Budgestory   May 2019 - Jun. 2019
Budgestory is a full stack web app that allows users to manage their personal finances through interactive charts. It uses React, Express, PostgreSQL and a library called Highcharts.

BattleShip   Apr. 2019
Battleship is a simple copy of the board game. It uses base technologies: HTML, CSS, and Jquery.

The Watering Hole   May 2019
A full stack web application that used Express, HTML, CSS, Jquery, Ajax, Knex, Postgres, and Sessions. The application allowed used to post resources that had a description, URL, and picture for other users to view. Users could like, comment, and rate the resources.

Tweeter   Apr. 2019
Tweeter is a single page application built with HTML, CSS, Node, Express and Jquery, Ajax, and MongoDB resembling a Twitter clone where users can post tweets and other users may view and like those tweets.

Activities

Canucks Fan
I watched Roberto Luongo's first playoff game with my father leading to a quadruple overtime Victory for the Canucks lasting 138 minutes. Since then I have been an avid Canucks fan taking immense interest in the unpredictability and drama of sports for the first time in my life. Extremely active in stats and critical analysis of players.

Magic the Gathering
Magic is a competitive card game that can be played in person or online. It is nearly 30 years old and offers players heavily analytical and strategic skill challenges for a game. Very communal and offers a platform for heavy discussion between deck creation, format health, and game strategy.

Dungeons and Dragons
Combines the story telling of novels with the interaction and skill of a board game. Quite fun and very engaging, I love having a dwarf accent.

Fishing
Not the greatest lover of the out doors but have found fishing to be extremely tranquil and relaxing. Often being hypnotized by the wake of the water. Find a very serene connection with our ancestral heritage long forgotten.
